Forecast for Friday 29 Oct 2021

Weather: Overcast with periods of rain through the bulk of Friday, with heavy outbreaks most persistent across southern and western ranges. A small change of squally winds and thunderstorms through the day. Drier clearing conditions spreading erratically from the south during the late afternoon and evening.

Chance of cloud free mountain/hill tops above 800m: 10% increasing 70% late in day.

Visibility: Moderate or poor in rain, very poor in hill fog with bases quite extensive above 450m for much of the day. Becoming mainly good as clearer conditions spread in late in day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Hazardous conditions for much of the day, with extensive hill fog, some heavy rain which brings some continuing flooding of some water courses.

Forecast for Saturday 30 Oct 2021

Weather: Better than Friday with a mix of showers and brighter spells holding sway, however some of the showers will be heavy bringing the risk of hail and thunder, also a chance of longer periods of rain crossing for a time, chiefly before mid-morning.

Maximum wind: South or Southwest beginning mean 25mph, with gusts reaching 40mph across most exposed ridges and summits. Winds gradually easing from mid-morning.

Chance of cloud free mountain/hill tops above 800m: 75% for any given time but little chance of prolonged clear conditions due to the showery nature of the flow.

Visibility: Good becoming moderate or poor in showers or any longer periods of rain, also very poor in hill fog with bases lowering 450m in showers or longer periods of rain.

Temperature: **Valleys:** Plus 5 Celsius increasing 15 Celsius during the afternoon
At 800m: Plus 4 Celsius decreasing Plus 2 Celsius late in day
Freezing level: Above all summits
